In the next few days it will rain a lot, the temperature will change little.

On the night of June 17, somewhere, more likely in the southeast, a brief thunderstorm is possible. Fog will form in places. The lowest temperature is 8 to 13 degrees. During the day in many areas there will be short rains, in places with thunderstorms, during the thunderstorms the northwest wind gusts will reach 15 m / s in some places. The highest temperature is 18-23 degrees.

On the morning of June 18, in the western part of the country, during the day it will rain a lot. Temperatures 7–12 degrees at night, 13–15 degrees at the seaside, 17–22 degrees during the day.

Bring soft drinks for refreshment and protection from the sun, heat and rain!

Many years of practice says that we still recommend preparing for rain protection, i. raincoats, umbrellas, suitable footwear, etc.
